

End of Product Life Management Evaluation (Sec. 5.0 in A138.1)

Guidance to manufacturers regarding clean fill usage and the eligibility of construction/demolition debris

Exploration of end of product life collection plan options by manufacturers and/or other beneficial reuses

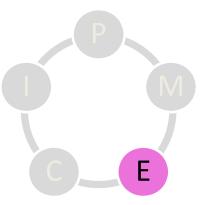

End of Product Life Management Evaluation (Continued)

Also, the following are addressed:

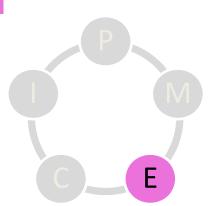

- •Products are durable, inert, low-maintenance, and engineered for permanent installations
- •Installations can last the lifespan of building—in some cases "forever"
- •Standardization efforts need statements which encourage the design, promotion, and selection of "permanent" finishes
- •Potential minimization of the necessity of interim (within the lifespan of a building) end of life management for tile products

End of Product Life Management Evaluation (Sec. 5.0 in A138.1)

- Clean Fill Eligibility
 - Elective: Product in compliance with state and local regulations for Clean Fill Materials (e.g. conformance with EPA leachability limits)

- End of Product Life Collection
 - Elective: Collection plan in place to recycle or re-task product
